EDUCATION

University of Florida

Bachelor of Science in Computer Science

- **Graduation with honors - Cum Laude**

Aug. 2022 - May 2026

Gainesville, FL

EXPERIENCE

Software QA Intern, Arthrex

Skills used: C#, .NET, Python, Git, Bitbucket, Jenkins, Selenium, Agile Scrum

- Collaborated in an Agile SDLC to ensure high-quality surgical software delivery through cross-functional communication with PMs, developers, and leadership
- Leveraged a C# & Selenium test framework, developed test case logic to increase automation coverage by 20%
- Expanded Jenkins pipeline to optimize test automation efficiency by 5% daily
- Built foundational infrastructure for test automation suites for the Nano 2 Console
- Cross-managed device code repositories using Git and Bitbucket, facilitating efficient version control

May 2025 - Aug. 2025

Jul. 2026 - Present

Santa Barbara, CA

Software Engineer Intern, Village of Tequesta

Skills used: Python, C++, DynamoDB, REST APIs, Libcurl, Agile Scrum

- Developed a C++ automatic data transfer program of employee info from local systems to DynamoDB storage, reducing manual workload
- Utilized Libcurl to process data alongside the employee timesheet software's REST API
- Created an automated subsystem to export data into Excel, enhancing H.R. reporting capabilities
- Deployed the program facility-wide, leading to adoption by 100+ employees and achieving an 83% satisfaction rate, ultimately increasing operational efficiency company-wide

May 2023 - Jul. 2023

Tequesta, FL

PROJECTS

ALAN: Academic Learning Analysis Network

Skills used: Python, Bittensor, Hugging Face, Docker, FastAPI, Git

- Developed a decentralized Bittensor subnet implementing miner-validator evaluation to incentivize high-quality academic journal peer reviews
- Deployed and tested a local Subtensor blockchain with Docker, integrating wallet management, subnet registration, and metagraph interactions
- Engineered LLM-powered validator pipelines to score peer reviews using multi-criteria evaluation and on-chain reward distribution
- Built data ingestion pipelines using the OpenReview API to preprocess academic review datasets for model evaluation

Jan. 2026 - May 2026

Someplace Else

Skills used: JavaScript, Python, AWS Lambda, API Gateway, DynamoDB, S3, React

- Developed a full-stack serverless web app using AWS Lambda and API Gateway for backend and DynamoDB for data storage, enabling users to share and explore geotagged locations
- Created an interactive map frontend with Leaflet.js by creating custom React components for map rendering and user interactions
- Accomplished geospatial data storage using DynamoDB, indexing with Leaflet.js, and S3 for image storage
- Used GitHub Actions to enable CI/CD for automated deployments

Oct. 2024 - May 2025

TECHNICAL SKILLS

Languages: Python, C++, C#, JavaScript, HTML/CSS, SQL, Batch script

Tools: Agile Scrum, Git, Node.js, Selenium, REST APIs, Docker

Libraries/Frameworks: .NET, Django, React, Pandas, Axios, Libcurl, Amazon ASK SDKs, Bootstrap, Leaflet.js

Cloud/Platforms: Bittensor, AWS Lambda, API Gateway, DynamoDB, S3
