## EDUCATION

### University of Florida

Bachelor of Science in Computer Science

Aug. 2022 - May 2026

Gainesville, FL

- **Graduation with honors - Cum Laude**

## EXPERIENCE

### Software Development Engineer in Test Intern, Arthrex

Jun. 2026 - Current

Skills used: Python, Pytest, C#, .NET, Git, Bitbucket, Jenkins, Selenium

Santa Barbara, CA

- Architected and led development of an automated test runner using Python and C# for a medical imaging console, using Pytest OCR to validate expected on-screen text results across localized UI screenshots
- Integrated the test runner with Jenkins to enable headless test execution in nightly CI pipelines
- Expanded automated test coverage by 11% for an arthroscopic surgical device by developing and integrating feature-level test cases into existing C#/.NET automation infrastructure
- Optimized Jenkins CI/CD pipelines to improve nightly automation efficiency by 7.1%, streamlining automated test execution and regression verification

### Software QA Intern, Arthrex

May 2025 - Aug. 2025

Skills used: C#, .NET, Python, Git, Bitbucket, Jenkins, Selenium, Agile Scrum

Santa Barbara, CA

- Collaborated in an Agile SDLC to ensure high-quality surgical software delivery through cross-functional communication with PMs, developers, and leadership
- Leveraged a C# & Selenium test framework, developed test case logic to increase automation coverage by 20%
- Expanded Jenkins pipeline to optimize test automation efficiency by 5% daily
- Built foundational infrastructure for test automation suites for the Nano 2 Console
- Cross-managed device code repositories using Git and Bitbucket, facilitating efficient version control

### Software Engineer Intern, Village of Tequesta

May 2023 - Jul. 2023

Skills used: Python, C++, DynamoDB, REST APIs, Libcurl, Agile Scrum

Tequesta, FL

- Developed a C++ automatic data transfer program of employee info from local systems to DynamoDB storage, reducing manual workload
- Utilized Libcurl to process data alongside the employee timesheet software's REST API
- Created an automated subsystem to export data into Excel, enhancing H.R. reporting capabilities
- Deployed the program facility-wide, leading to adoption by 100+ employees and achieving an 83% satisfaction rate, ultimately increasing operational efficiency company-wide

## PROJECTS

### ALAN: Academic Learning Analysis Network

Jan. 2026 - May 2026

Skills used: Python, Bittensor, Hugging Face, Docker, FastAPI, Git

- Developed a decentralized Bittensor subnet implementing miner-validator evaluation to incentivize high-quality academic journal peer reviews
- Deployed and tested a local Subtensor blockchain with Docker, integrating wallet management, subnet registration, and metagraph interactions
- Engineered LLM-powered validator pipelines to score peer reviews using multi-criteria evaluation and on-chain reward distribution
- Built data ingestion pipelines using the OpenReview API to preprocess academic review datasets for model evaluation

## TECHNICAL SKILLS

**Languages:** Python, C#, JavaScript, SQL, HTML/CSS, C++, Batch script

**Developer Tools:** Agile Scrum, Git, Node.js, Selenium, REST APIs, Docker

**Libraries/Frameworks:** .NET, React, Tesseract, Pandas, Axios, Libcurl, Amazon ASK SDKs, Leaflet.js

**Cloud/Platforms:** Bittensor, AWS Lambda, API Gateway, DynamoDB, S3
